

Reach.

From the creators of ICAS, a full-cohort assessments package that gives you an objective annual benchmark of your students' progress.

Reach helps stretch your students of various levels of performance to reach their full potential. Reach is a suite of annual online benchmarking assessments for schools who wish to fine-tune classroom practice using data-based insights.

Its engaging questions draw on the decades of rigour and expertise of the team behind ICAS. If you like ICAS, you'll love Reach.

Why Reach?

Benefits students at a variety of performance levels, from highest percentile to lowest, and especially those in the middle.

Designed by our team of psychometricians, education measurement experts and experienced teachers specifically to support time-poor teachers via accessible insights.

Gives your teachers a detailed and objective benchmark of progression at a classroom, year or school level.

Choose from flexible test dates within a six-week window to suit your school's busy schedule.

Tailor your own Reach: run one subject or a combination, for your entire school, one year level or even one class.

Online and efficient – your teachers can deliver, monitor and send tests for marking with the click of a mouse.

“ Reach is a great assessment that provides a wide range of questions across all scientific skills. The questions can be accessed by all students, thereby increasing the confidence in student ability while providing a small range of very challenging questions for the highly gifted. The assessment data available with Reach results allows my teachers to reflect on their teaching practice and make modifications. This provides students greater depth in learning the science concepts while reducing teacher load in writing assessment items. Reach Science is therefore incorporated as a compulsory assessment for Year 7 to 10 at Normanhurst Boys High. ”

Sohini Bhave, Head of Science
Normanhurst Boys High School (NSW, Australia)

The Reach dashboard lets you drill down into whole cohort, class or individual student skill areas to celebrate or consolidate.

- ✓ Tests problem-solving, knowledge-application, reasoning and analysis
- ✓ Trusted by government, independent and Catholic schools
- ✓ Tens of thousands of tests delivered each year across Australia, New Zealand and the world
- ✓ Interactive, customisable reporting dashboard
